**Career Objective:** A passionate and highly motivated front-end developer with JavaScript, and React JS. I am seeking a challenging position in a dynamic and collaborate environment where I can contribute my skills to create user-friendly and visually appealing web applications.

### **Projects:**

➤ Todo List : <https://gopianimisetti.github.io/todolist>

The Todo list project is a basic web application built with React.js that enables users to manage their daily tasks by adding, deleting, editing and marking tasks as completed.

➤ Weather App : <https://weather-app-navy-pi.vercel.app/>

The Weather App is built with React JS by using open weather map API that allows users to check the current weather and displays the relevant weather information in UI.

➤ Landing Page: <https://gopianimisetti.github.io/landingpage>

A landing page is built with React JS designed to capture the attention of visitors and encourage them to take a specific action, such as signing up for a service, downloading an app. In the context that showcases the product, service, or brand with an attractive and engaging user interface.

➤ E-Prathibha: <https://gopianimisetti.github.io/e-prathibha>

The E-Prathibha project provides students with access to previous question papers from previous years. This allows students to practice answering questions in the same format as the actual exam. Solving previous year's question papers helps students understand the question pattern.

**Skills:** HTML, CSS, Java Script, React JS, Redux, Boot strap, MS word.

**Declaration:** I hereby declare that all the above information is true to the best of my knowledge.
